THE NEW YORK HERALD. - A correspondence to the Richmond Whig speaking of the

New York Herald, says: The editorial staff consists of one chief, one nanaging, one financial, one city editor and city teditorial writers. The ship news, foreign news, domestic news, statistical matters and trauslation departments each have a chief, with such assistance as he may require from the city department. The city department is presided over by a chief who must have gone through all the gradations of the reportorial

department. This force consists of twenty seven reporters, who cover all the news points in New York. Jersey City, Brooklyn and contiguous places of easy access to New York. The salary of the managing editor is \$3,000 per annum, financial editor \$5,000 per annum, and the writers or sub editors, from \$40 to \$60 per week.

The clerical force of the paper numbers about twenty, divided into relays for day and night work. The editorial force meet daily in the "council room" of the establishment. The meeting is presided over by Bennett, father or son, as the case may be, or in the absence of both these; gentlemen, then by the senior writer, Dr. George B. Wallis who, by the way, is a native of Richmond. At this conneil all the current questions of the day are discussed, all formality in speaking on topics is avoided and it partakes more of a family gathering. Mr. Bennett, after carefully looking over his memorandum of "points" breaks silence, and the conversation takes a cheerful turn and continues for upwards of two hours. In the interim each editor in assigned to write

a certain article. Mr. Bennett, senior, has not written an article for the Herald for many years, yet he identities himself with the editorial columns by requiring the editors to keep the tone and style of their articles within certain cardinal points.

r. Bennett has a telegraph wire (nine miles) connecting the Herald office with his residence at Fort Washington; also a shorter line (three miles) to his house on Fifth avenue. By this means he is in constant communication with the office. Important news from Europe and indeed from any part of the world is announand he frequently sends the points for a leader over the wires, the telegraph key being man pulated by the gentle hand of his beautiful dau hter, Jeannette.

The foreign correspondence of the Herald is now in charge of a gentleman in London, who occeives a salary of \$5,000 per year in gold. He moves and instructs the correspondents at the various European capitals.

The receipts from advertising range from \$2. 500 to \$5,000 per day, according to the changes in the busy seasons of the year.

Mr. Bennett's income from his real estate and newspaper is \$225,000 per year, and that of his son \$45,000.

Mr. Bennett, sr., is seventy-five years of age. yet his brain is as vigorous as it was twenty years ago. His habits are of a very abstemious character, and to this he ascribes his good

ABSENT MINDEDNESS. Absent-mindedness even when its manifestations are harmless, is Discovery the best preparation I know of. not a trait to be commended in men of genius or others. It is worthy of note, however, that it is no sign of mental inferiority, but rather seems to be a failing peculiar to the higher order of mind. Literary biography abounds in anecdores of the kind which we have quoted, not for the sake of proving "an undisputed thing in such a solemn way," but as an introduction to an exceedingly neat instance of absent-mindedness which lately came under our observation, and from which the newspaper reporter of the period has not yet taken the bloom. One hot August afternoon a gentleman, whose name attached to a cheque would be more valuable to the reader than it would written here, was standing in front of the Revere House waiting for a Washington street c. v. He was a slim, venerable gentleman, with long white hair, and a certain dignity look, removing all dandruff and scurf. It is the about him which we suppose comes of always most economical preparation in use. Put up in heaving a handsome balance in the bank, for large bottles, at one dollar.

ARTHUR NATTANS, we net er knew a poor man to have this partieular air. It was a sultry after, on, and the milli onaire, standing on the curb-scare in the sho de, had removed his hat, and was cooling nds forehead with his handkerchief like any con imon person, when the Cambridge horsecar stopped at the crossing at his feet. From this car hastily descended a well-known Man of Letters whose pre-occupied expression showed at once that he was wrestling with an insub ordinate hexametre or laying out the points of a new magazine article. Suddenly he foun I himself face to face with a white-haired Qh! n an dejectedly holding a hat in one hand. As quick as thought, the poet-to whom neither old age nor young appeals in vainhis hand into his vest-pocket, and, thritst drop pic g a handful of nickel and fractional currency in, o the extended hat, passed on. The millionair e & azed aghast into the hat for an instant, and then inverted it spasmodically, al lowing the money to drop into the gutter, much to the amusement of a gentleman and a tooth-pic con the steps of the Revere House, and very much more to the amusement of another pa rty who chanced to know that the supposed a tendican't and man of letters had been on ter ms of per onal intimacy these twen-

WITH INTEREST: Under date of April 26th, 1871, Dr. HENRY J. ROGERS, 68 Sharp street, Baltimore, an eminent physician, writes regarding

CRYSTAL DISCOVERY: "It affords me much pleasure to bear testimony as to the efficacy of your Crystal Discovery. Some years since, while in India, I suffered from a severe fever peculiar to the country. On my recovering, a patch of hair on the left side of my head became perfectly white, without at all arfecting the remainder. To remove this unsightly appearance, I had recourse to various prepara-tions, both in Europe and in this country; but they all had one great defect—they dyed the hair black. Now, with your Crystal Discovery,

Yours truly, HENRY J. ROGERS. Now as the fact becomes more patent every day that the various dirty and filthy preparations advertised as Renewers, Restoratives, &c., are but compounds of Sugar of Lead and Sulphur, and therefore should be shenned by all who value their health, it is scarcely a matter of surprise that the demand for NATTANS' CRYS TAL DISCOVERY, admitted to be perfectly harmless, and yet accomplish all, and more, than the poisonous articles claim to do, should have increased so rapidly. It restores the color and growth of the hair positively in a few days; strengthens the roots, makes an excellent dressing, soiling neither clothes nor scalp; but on the contrary it gives the scalp a pure and cleanly

This distressing Affection—which renders his miserable and marriage impossible—is the penalty paid by the victims of improper a duly encies.
